Allowable Subject Matter

1. Claims 1-12 and 16-26 are allowed.
2. The following is an examiner's statement of reasons for allowance:
3. The prior arts of record do not anticipate or render obvious to one skilled in the art a method of fabricating a color filter substrate for use in a liquid crystal display comprising various steps as claimed, more specifically patterning the black matrix to form an identification mark at a periphery and near a corner of the substrate and a plurality of color filter patterns.
4. The closest reference USPAT 5,361,150 (Noguchi) discloses the formation of an identification mark having a character pad. Further, the newly cited reference USPAT 6,597,427 (Katsu) is related to forming identification marks. However, none of the references alone or in combination teach or suggest in any way the step of forming an identification mark by patterning the black matrix.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
